

## Add a character to the stage

1. Make sure you have a Scratchjr project open
2. Touch  on the left of the screen.

3. Scroll down and choose a character.

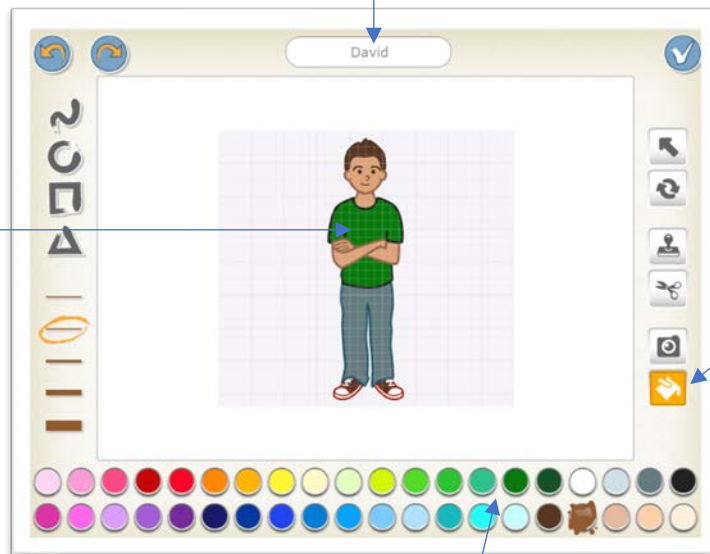

Tap on the character then on the tick  to select it.

4. If you want to change a character 's appearance tap on the paintbrush

4 Change the boy's name by typing here

3 Tap the boy's top to change its colour

1 Make sure the paint pot is selected

2 Select green by tapping on the paint colour

Tap  when you are finished. Your character will now be on the "stage", the main screen for your app.

5. You can move the character around the stage by touching and dragging them.
