

## Scratchjr set up

Tap on the Scratchjr logo on the Home screen  
The app will open and you will see this screen

Tap the house icon on the left of the screen.  
The first time you do this you might be asked if you are at home or school.  
Answer the question.

You will then be taken to either

- a new project with a cat on its stage

- or to the project page

If you see the project page tap the

button

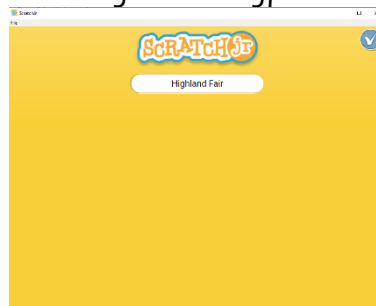

This will take you to the screen with the cat on it. You can now start working.

However, before you start it is a good idea to give your project a name and save it.

Tap on the orange shape at the top right of the screen

You will then see a screen where you can type in a title.

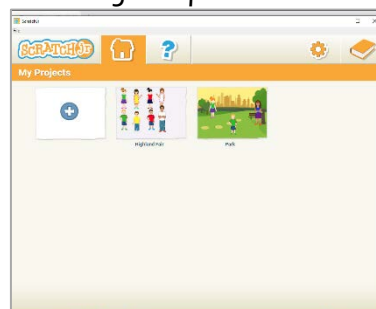

Add a title then tap

You are now ready to start making your animation.

If it is not the first time you have opened Scratchjr you will be taken to the project screen which should have your previous work showing

Tap on the project you want to open then resume working on your project.
